DOOR LOCK TO SECURE IT RACKS

3-digit combination door locks with handles to enhance security and prevent unauthorized access

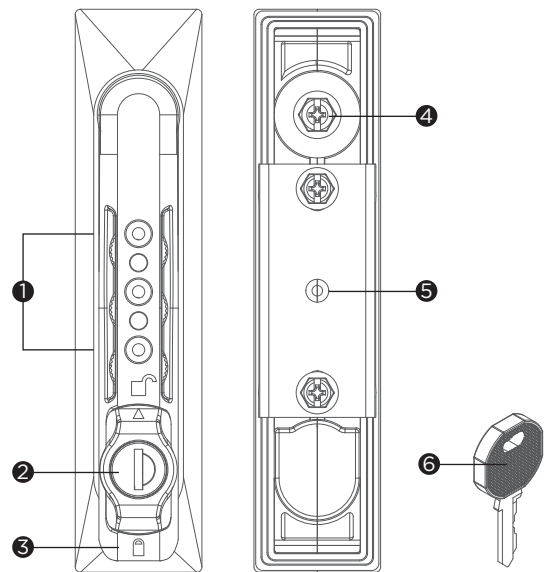

Designed to secure your IT environment with the appropriate protection, the Security Series secures racks to enhance safety. The products are standard design, which can be easily integrated in the front and rear door of rack enclosures to protect IT equipment. Administrators can open the racks by entering the correct 3-digit password, or by using the key. Moreover, when the password is unavailable, administrators can use the key to override the password. The handle can be pulled up for convenient handling after the door is unlocked.
